

PROTECT 2.0 ANTI-VIRUS

NANO TECHNOLOGY
REUSABLE MASK

- ✓ KILLS 99.9% OF VIRUSES INSTANTLY
- ✓ NANO TECHNOLOGY FILTER MEMBRANE
- ✓ ULTRA LIGHT & BREATHABLE

BETTER

THAN AN N95 MASK

Discover a reusable mask,
that is not only more efficient and protective than an N95,
but also more comfortable and breathable than an N95.

INNOVATIVE TECHNOLOGY WITH NEVER SEEN BEFORE BENEFITS:

ULTRA BREATHABLE

ANTI-POLLUTION

PM 0.3 MICRON

ANTI-POLLEN

ANTI-VIRAL

ANTI-BACTERIAL

INCREDIBLE FEATURES

ADJUSTABLE NOSE CLIP

ADJUSTABLE EAR LOOPS
FOR PERFECT FIT

WASHABLE & REUSABLE

EXTREMELY BREATHABLE

FILTER EFFICIENCY –
99,2% for particles
up to 0.0003 mm

KILLS OVER 99%
OF VIRUSES AND BACTERIA

ULTRA-THIN FUNCTIONAL MATERIAL
for minimal heat retention

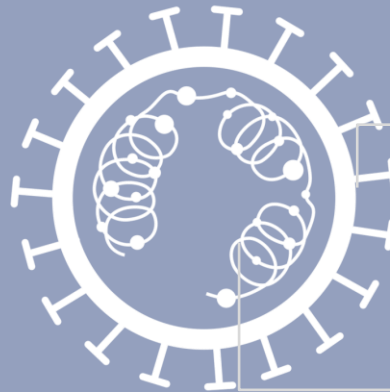

DESTROYS 99.9% VIRUSES ON A MOLECULAR LEVEL

BUT HOW?

All viruses are composed of genetic material contained within a protective protein coat.

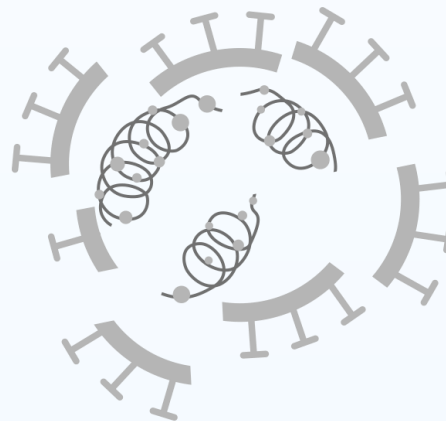

But without this protective layer, the RNA of the virus cannot survive or multiply.

PROTECTIVE PROTEIN COAT

RNA (The genetic material of the virus)

The outer and inner layer of Avevitta Protect 2.0 Mask is coated with a unique (skin-safe) antiviral finishing agent, which attacks and denatures the protective protein coat. Once the coat is destroyed, the virus's genetic material quickly disintegrates.

1, 2, 3, NO MORE VIRUS.

In third-party testing, this effect has been proven to kill 99.9% of the viruses!

POWERFUL FILTRATION CAPABILITIES

Yet, still breathable.

The most harmful particles are some of the smallest. Pollutants, bacteria, viruses, and toxic smoke pass through the filter seamlessly and end up directly in your lungs. That's why we designed the Anevitta's innovative PTFE nano filtration membrane, to filter 99.2% of particles 0.3 microns in diameter.

That's 3/10000th of a millimeter.

Bacillus
Bacteria

0,5
microns

Toxic
smoke

2,5
microns

Red Blood
Cell

7 microns

Pollen & Dust

10 microns

Scale : 1 cm  = 10000 microns

The Filtration Capabilities of AVEVITTA PROTECT 2.0 is 99.2% - higher than traditional N95, KN95 and FFP2 masks

MADE FROM NATURAL COTTON

Sometimes simple is best. The natural cotton inner and outer layer of the mask is coated with a skin-safe antiviral protective agent.

PTFE NANO FILTRATION MEMBRANE

Innovative spider-web micropore structure with a pore diameter of 100-200 nanometers that physically prevents harmful particles from coming penetrating.

ERGONOMIC DESIGN

Ultra thin, light and Breathable design for comfortable breathing experience, even in hot weather

WATER PROOF AND DUST PROOF PROPERTIES

Keep your mask clean from being contaminated, dirty and stained with its water and dust proof properties

ANTI-BACTERIAL

Proven to destroy 99% of bacteria.

AND MOST IMPORTANTLY, PROVEN TO KILL VIRUSES.

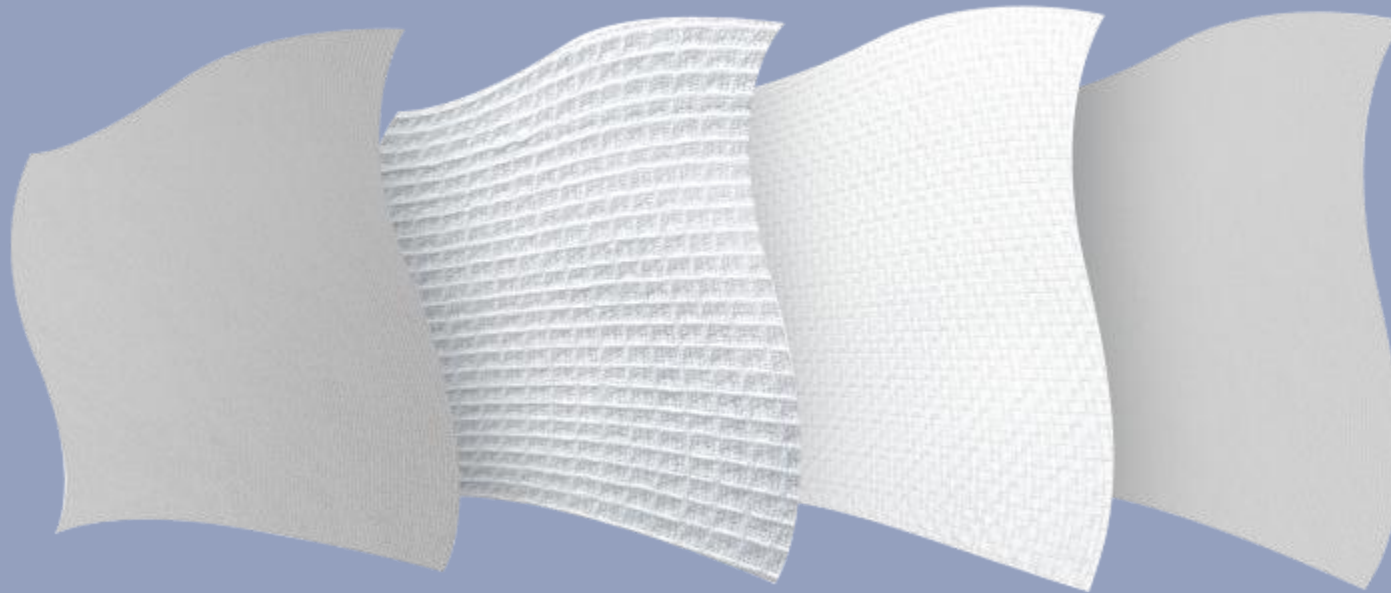

AVEVITA Protect 2.0 VS N95

The Best of everything, in one mask.

	AVEVITA PROTECT 2.0	N95 MASK
		
ANTI-VIRAL	≥99.9%	0%
ANTI-BACTERIAL	≥99.9%	0%
FILTRATION LEVEL	≥ 99.2%	≥ 95%
ECO-FRIENDLY	✓	✗
REUSABLE	✓	✗
ADJUSTABLE FIT	✓	✓

TARGETED FUNCTIONALITY

Each layer is engineered to provide you with the best protection:

1

2

3

4

1

OUTER LAYER

Ultra thin cotton that can kill over 99% of viruses and bacteria thanks to a unique skin safe coating agent that destroys the molecular structure of the virus.

2

POLYPROPYLENE PTFE NANO FILTRATION MEMBRANE

That filters 99.2% of harmful particles as small as 0.3 micron, such as viruses, bacteria, dust, pollen and pollution.

3

4

INNER LAYER

Soft breathable cotton, with high moisture control.

The inner layer is also 99.9% anti-viral, to prevent cross-contamination in the case that you are sick.

AVAILABLE IN:

WHITE

GREY

PINK

BLUE

THE AVEVITTA PROTECT 2.0 ANTI-VIRUS MASK COMES IN ONE UNIVERSAL SIZE, ADJUSTABLE TO FIT ALL ADULTS.

CARE INSTRUCTIONS:

- Hand wash with soap and water.
- No hassle, quick-dry mask
- Do not iron

GUARANTEED EFFICIENCY FOR AT LEAST 20 WASHES

PROTECT YOURSELF

and live your life to the fullest with Avevitta
